

Building Energy Benchmarking Program

The Building Energy Benchmarking Program requires the owners of large commercial and multifamily buildings to report energy use to the California Energy Commission by June 1 annually. The Energy Commission will make the information public so people can better understand the buildings in which they live and work.

Commercial

Most commercial buildings more than 50,000 sq. feet

Multifamily

Buildings more than 50,000 sq. feet and 17 or more residential units

How to Comply

Step 1:

Collect Building Information

Step 2:

ENERGY STAR Portfolio Manager

Step 3:

Utility Data

Step 4:

Review Data for Accuracy

Step 5:

Submit Report
