

BRIDGING THE GAP

Transforming your energy and climate vision into real-world, grounded solutions

Established **IMPLEMENTATION STRATEGIES** to achieve your goals faster, with less risk, while delivering public benefits.

City of **FONTANA** implementing a **clean energy microgrid in a disadvantaged community**, with facilities that can serve as an emergency headquarters and cooling location.

LOS ANGELES METROPOLITAN TRANSPORTATION

AUTHORITY energy management plan for 2,000 facilities and execution of energy saving retrofit and renewable energy projects.

Cities of **CHULA VISTA** and **SANTA BARBARA** developing **roadmaps to zero net energy** for portfolio of municipal buildings.

Community choice energy providers (**PENINSULA CLEAN ENERGY** and **EAST BAY COMMUNITY ENERGY**) as well as Cities (**SANTA MONICA, PALO ALTO**, and **SAN MATEO**) are developing, promoting, and implementing **building energy reach codes**.

City of **SANTA ANA** made **high-impact energy efficiency investments**, including HVAC and lighting, with more than \$1 million in grant funding.

City of **LONG BEACH** and **LOS ANGELES COUNTY** retrofitted **85,000 total streetlights** for greater efficiency and public safety. Long Beach helped fund the project through 0% interest utility on-bill financing.

City of **CARLSBAD** developed an **advanced microgrid** with five types of distributed energy resources to provide resilient power for critical emergency first-responder services.

ASSESSING YOUR OPTIONS & MAXIMIZING YOUR OPPORTUNITIES

- 1 Review existing action plans and discuss goals, timeframes, and resources
- 2 Collect data and establish baseline performance
- 3 Target projects/sites and perform technical analysis
- 4 Commit to immediate and long-term projects
- 5 Develop scope of work
- 6 Apply for external incentives and financing
- 7 Win city council approval
- 8 Build and benefit from projects

Decades of partnership with local governments for resilient, efficient energy solutions.
