

Energy Assessment Screening for your Home

Effective Public Program for Community Wide Energy Conservation & Efficiency

A free residential home energy assessment program for residents in the San Gabriel Valley. The program is known as the Energy Assessment Screening for Your Home, or EASY for short. The goal of EASY is to help residents find ways to make their home more energy efficient, as well as help residents save money on their utility bills.

How it works:

1

Schedule a free home energy assessment at participating city's permit counter or online at www.sgvenergywise.org/easy

2

Complete the home walk-through & evaluation with EASY consultants.

3

Implement the best practices for your home & achieve energy savings!

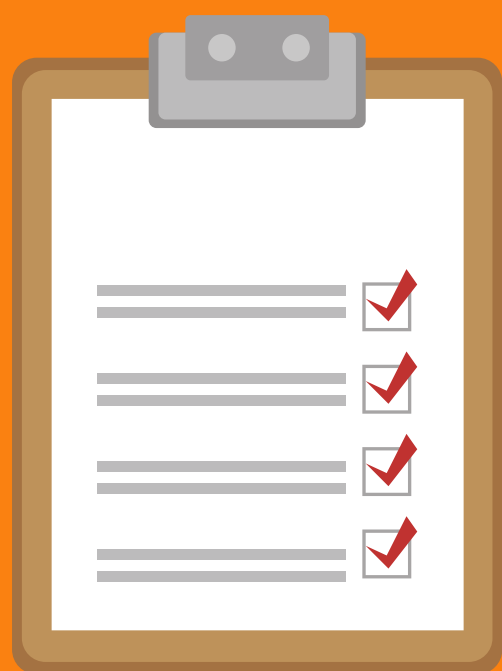

Inform resident on whole house approach with presentation and introduce/demonstrate infrared camera.

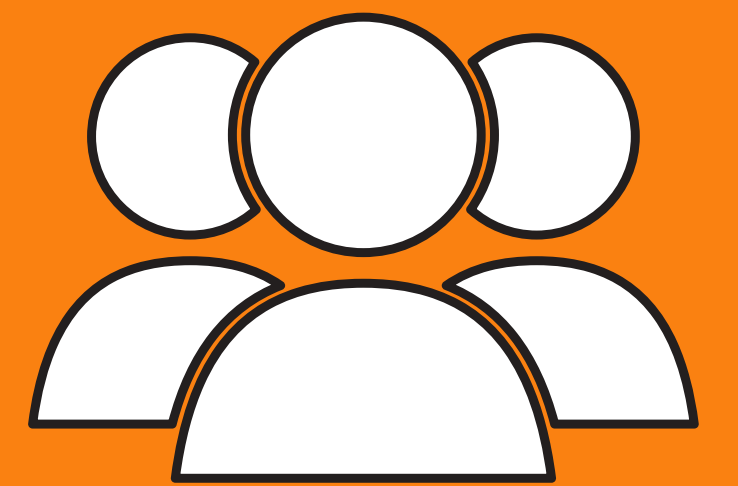

Go through checklist item-by-item with resident, members alternate sections, use demonstration tools for appropriate sections (energy monitor for electronics, camera for insulation).

Review checklist recommendations to develop short-term and long-term plans for resident, use Homeowner Packet to point to specific rebates/programs that apply to recommendations, and follow up with an in-depth report.

500+ assessments completed
5,000+ residents reached
3,000 recommendations given
162 community events attended

RESULTS

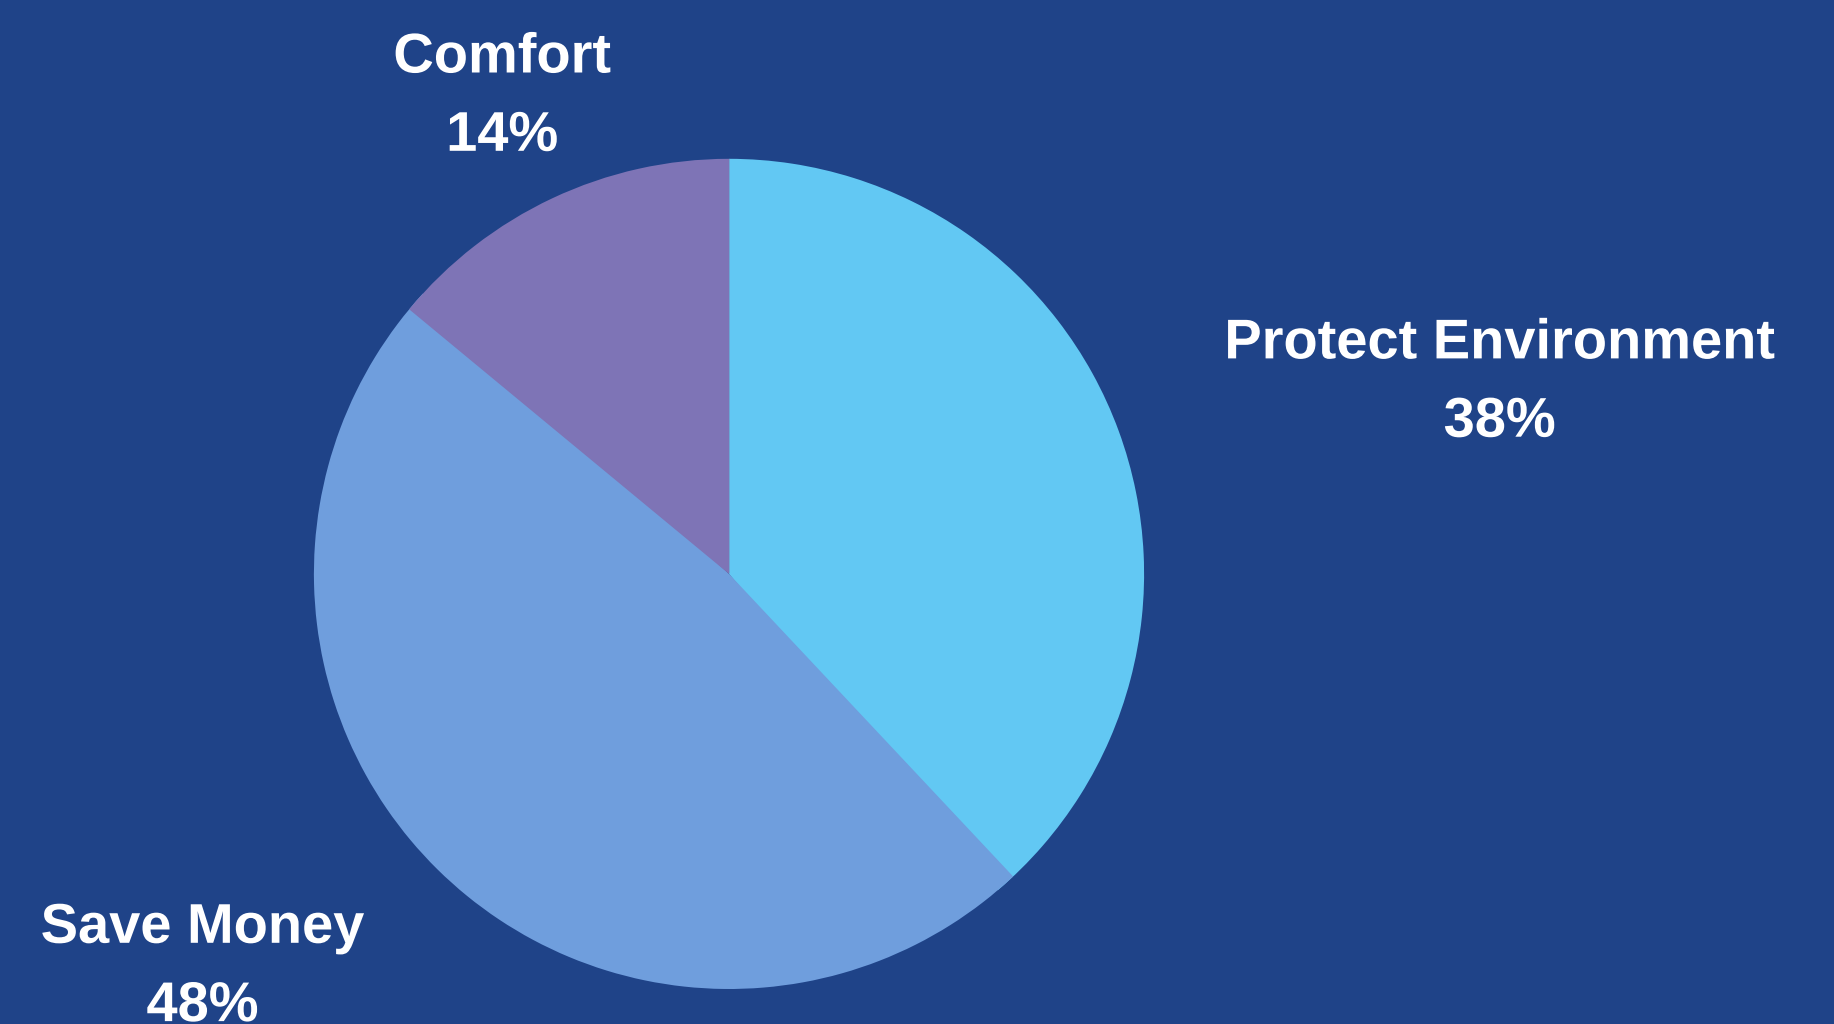

71%

of participants have completed one or more assessment recommendations

56%

completed both high & low energy-saving recommendations
