EnergyPro Lite
Multifamily Energy Modeling for the Real World

NO-COST LICENSE FOR CITIES AND ENERGY EFFICIENCY PROGRAMS

A streamlined version of the EnergyPro software, developed specifically for use with existing multifamily buildings.

Now freely available to cities and energy programs through a grant from the California Energy Commission.

Easy-to-use software includes a comprehensive manual and clear, owner-facing reports.

All-in-one tool for evaluating energy upgrades:
- No-cost license
- Lighting
- Domestic hot water
- HVAC
- Building envelope
- Water conservation
- Electrification
- Owner AND tenant savings
- CPUC ratepayer program approved

Can model ANY existing multifamily building (5+ units):
- Low-rise, high-rise, garden-style
- Affordable, low-income, market-rate
- Rentals and condominiums
- Common area and in-unit energy baselines and savings estimates

Upcoming features:
- Measure cost and payback
- Site-specific energy rates

Under 2 Hours TO CREATE FULL MODEL AND PROJECT SCOPE

460 PROJECTS MODELED TO DATE REPRESENTING 31,400 UNITS

CURRENTLY USED BY:

- BAYREN MULTIFAMILY
- PG&E Multifamily Upgrade Program
- City of Berkeley
